

Your Device & Context

Everything you need: apps, browser, terminal.

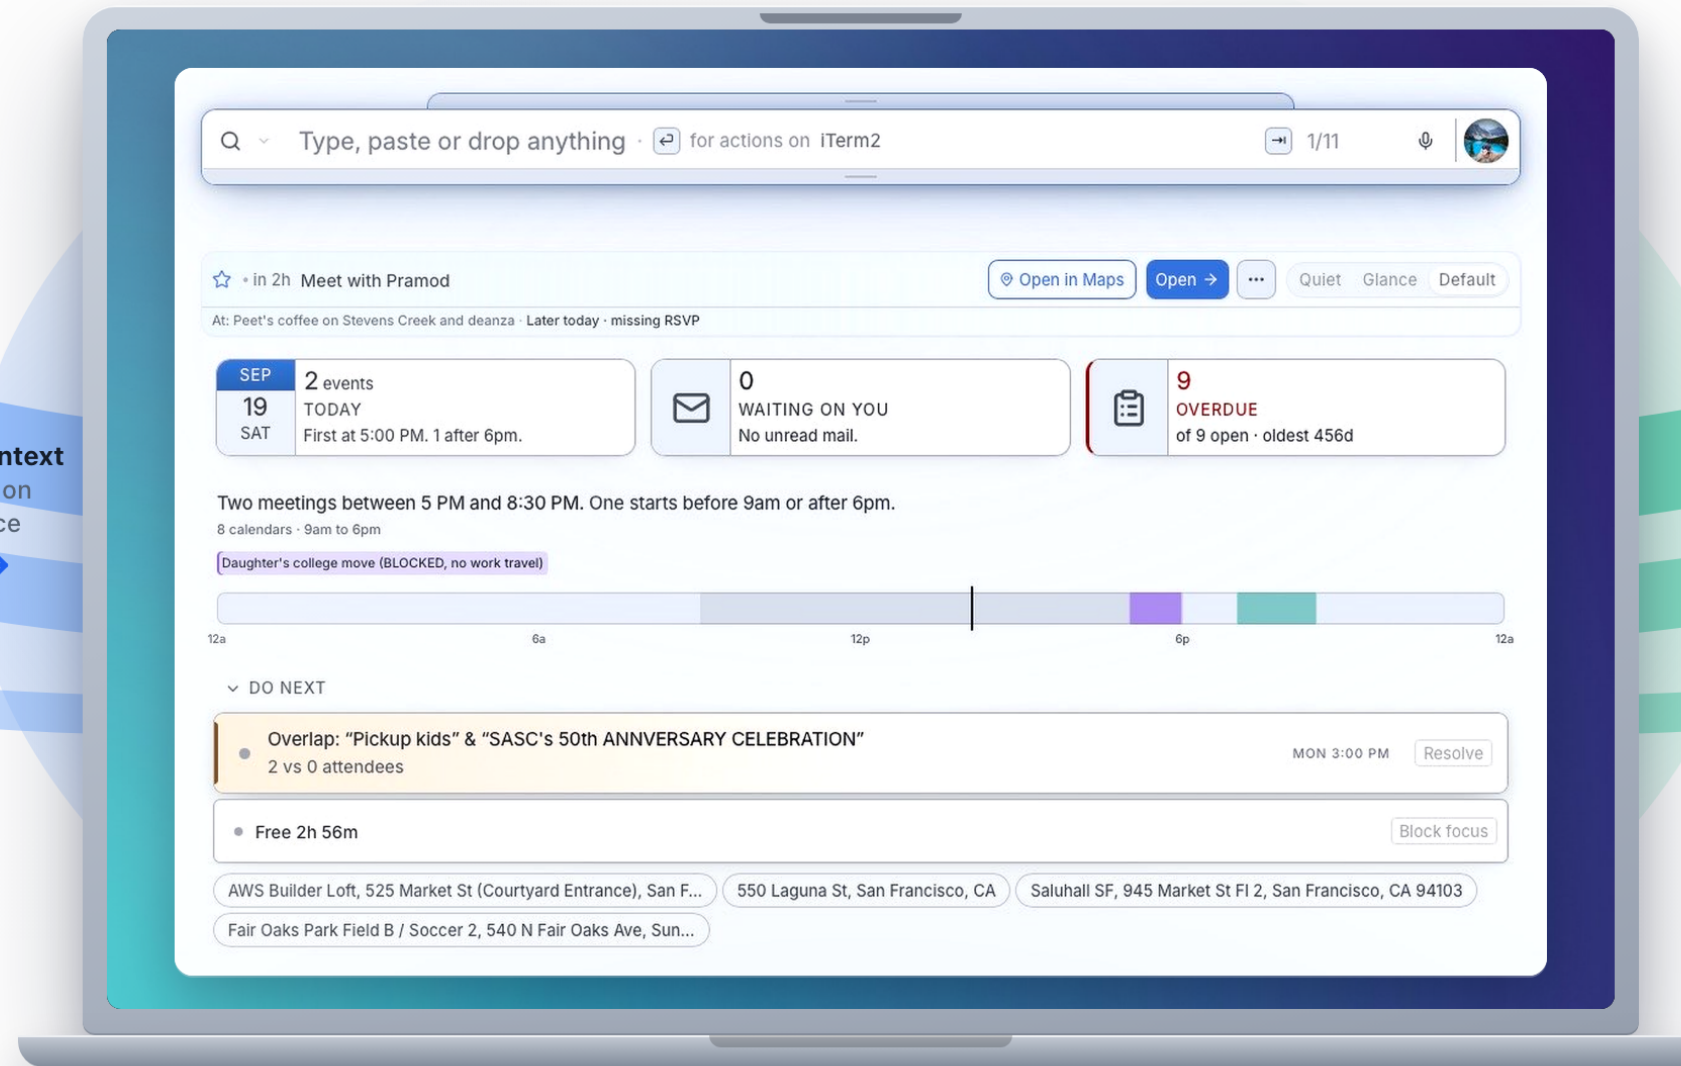

-  **On Top of Any App**
Context-aware, wherever you work
-  **Files & Documents**
Search, summarize, find anything
-  **Clipboard & History**
Encrypted, searchable
-  **Notes & Annotations**
Capture, organize, revisit
-  **Recall & Memory**
Find anything you've seen, said or done
-  **Calendar & Meetings**
At a glance, join, act
-  **Email & Communication**
Inbox, drafts, context
-  **Screenshots & OCR**
Understand images and text
-  **Local Vision (on-device)**
Opt-in, runs locally
-  **Terminal / CLI**
Run commands, scripts, tmux
-  **Secure Browser**
Built-in, isolated, work-ready
-  **Passwords & Secrets**
1Password, Bitwarden, Keychain. Copy or fill locally
-  **Local Apps & Utilities**
Shortcuts, automation, workflows
-  **Role-Specific Utilities**
Finance, security, engineering, healthcare

Your context
stays on
device

A governed AI workspace for real work.

Context-aware, on top of any app. Bolt puts your local context, tools, agents and enterprise systems at your fingertips. Hotkey or click, from the dock, menu bar or status bar.

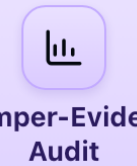

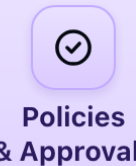

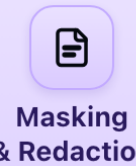

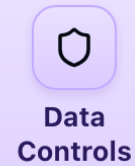

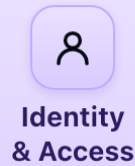

Actions
with your
permission

Your data. Encrypted and masked. With your rules.

Governed by default

Your Ecosystem

Keep your stack. Bolt works with it.

-  **AI Models**
Local and cloud. Your choice.
-  **Agents**
Built-in or bring your own
-  **Agent Gateway**
Secure relay for agents and CLIs
-  **MCP Tools & Servers**
Open MCP. Bring your own servers
-  **ACP & A2A**
Interoperate across agents
-  **SaaS Applications**
Google Workspace, Microsoft 365, Slack, Salesforce. 105 connectors in all
-  **In-House Systems**
Internal tools, APIs, databases
-  **Tamper-Evident Audit Trail**
Ed25519 and Merkle chain, verifiable offline
-  **Developer Tools**
GitHub, GitLab, CI/CD, IDEs, etc.
-  **Custom Connectors**
YAML config, or build your own
-  **SSO, SCIM & IdPs**
Okta, Entra ID, Google. SAML, OIDC, provisioning
-  **MDM & Device Management**
Deploy, configure and enforce at scale
-  **Your DLP & Policies**
Honors your existing rules and labels
-  **Windows, macOS & Linux**
One workspace, every platform

 **Find, plan and act**
From simple tasks to complex workflows.

 **Work with agents**
Use built-in agents or bring your own.

 **Extensible by design**
MCP, ACP, A2A and more. Adapt as the ecosystem evolves.

 **Your data stays yours**
Encrypted, private and under your control.

 **Built for individuals and teams**
From productivity without trading privacy, to enterprise controls.
